

Diabelski Młyn

Construction name Ferros wheel 'Legendia Flower'
Client Amusement park Legendia
Construction year 1985
Application coating system Ekomet Byton
Date of application April 2017
Location Chorzów, Polen

The Legendia theme park is located in Chorzów, Poland. The theme of the park is all about Polish legends and fairy tales. Previously the park was called 'Silesian Merry Town', but with the modernization of the park in 2016 the park changed its name.

The diabelski młyn 'Legendia Flowers' is a 40 meter high Ferris wheel. It is the tallest Ferris wheel in Poland. The word diabelski młyn literally means 'devilish mill' in Polish.

The Ferris wheel has been modernized and a new layer of coating has been applied by Ekomet Byton. The SteelKote coatings are applied to the Ferris wheel to protect the structure from rust and dirt.

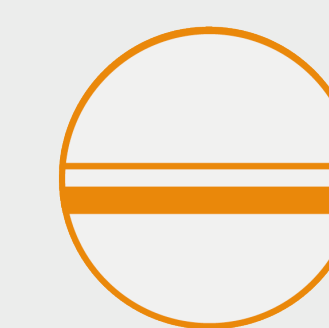

C3 C3 High ≥ 15 year		
Layer 1	803 SteelKote EP AC+	100µm
Layer 2	808 SteelKote PC HS UV+	100µm
