

## Van Wamel

Company name	Van Wamel B.V.
Branch	Agricultural machine - construction
Field of activity	Worldwide
Location	Beneden-Leeuwen, The Netherlands
Application coating system	Automated spray robot

Van Wamel BV is manufacturer of the brand PERFECT. They produce flail mowers, rotary mowers and sorting machines for fruit and vegetables. These products are used worldwide in fruit growing. Due to combining the best materials with the latest production techniques, they deliver reliable products of excellent quality.

The coatings are sprayed both manually and with a spray robot. By using the electrostatic spraying method, the typical orange colour (SK295) is applied to the machines in a thin layer of paint.

The products 16411W and 154W are tailor-made for Van Wamel BV, based on the technology of the SteelKote products. The products correspond to the SteelKote Pacific 90 UV+. This product is extremely suitable for agricultural machinery because of the protection in a moderately aggressive environment.

C3 C3 Medium 5-15 years		
Layer 1	16411W Unibar ZF Primer	80µm
Layer 2	154W Poluran TC Express HB	40µm
<b>Total</b>		<b>120 µm</b>
