

VDL Mast Solutions

Company name: VDL Mast Solutions
 Branch: Mast construction
 Field of activity: International

VDL Mast Solutions, formerly KAAL Masten, has been part of VDL Groep since 2017. They design, produce and install high-quality masts. They take care of the entire production process, using recyclable steel. The masts are then sustainably coated with DualCure. This reduces maintenance costs and prolongs service life. The production process is accelerated by rapid hardening of the coating without forced drying. The dirt-repellent coating ensures that the masts require little maintenance.
